UNIVERSITY OF LUXEMBOURG

Group X

FACULTY OF SCIENCE, TECHNOLOGY AND MEDICINE

INTRODUCTION: THE PROBLEM

What is the topic, and why does it matter now? State your focus question.

1 · TECHNOLOGY

How does it work? What can it do – and not do? (a diagram beats a paragraph)

2 · EVIDENCE & IMPACT

Real cases and data: cost, time, accuracy, users … Cite every number.

3 · STAKEHOLDERS | 4 · RISKS, ETHICS & LAW | 5 · IMPLEMENTATION PLAN

3 – Who gains, who loses, who decides?
4 – Ethical, legal (GDPR, EU AI Act), security and project risks
5 – A company wants to introduce it: how would you run that project? Scope, timeline, key risks (e.g. a mini Gantt chart or risk matrix)
Groups of 6: add 6 – Future Outlook & Recommendations

CONCLUSION: OUR POSITION

A clear, justified answer to your focus question.
